PROFESSIONAL SUMMARY

High-achieving Software Engineering student with proven leadership in university tech societies.
Hands on experience in Generative AI, leveraging prompt engineering to build efficient, scalable AI-driven applications..
Vice President – CyberSphere (2024–2025)
Current Vice President – Riphah Computing Society (2026–2027).
Passionate about leveraging technology to create innovative solutions and continuously enhancing my expertise in tech.

EDUCATION

BS Software Engineering	2023 – 2027 Riphah International University, Islamabad CGPA: 3.99 / 4.0
Pre – Engineering	2020 – 2023 FG Post Graduate College For Women, Kashmir Road, Rawalpindi

KEY PROJECTS

FashionNova An AI Based Web App in which you can make your own profile with your image and waist, sleeves, chest sizes etc. You give it the outfit you want to stitch and its style. It generates an image and Specs Sheet of your final clothes stitched. You can also project the image on you to see how it would look on you.

Drowsiness Detection System A real time Goal-Based and Utility Based AI agent that detects facial features using media pipe and checks if the driver is drowsy, awake, or sleeping based on the rules. It generates sound and visual alerts.

Swift-Scan A completely working platform for new developers to understand others codes and repositories. it takes a github link and explain the code, and also generates a setup guide. It is partially deploys and can work as an extension

StrideWars Online Health Fitness App UI Designing of App for Gym Fitness people with a touch of gaming.

Prestige Online Hotel Reservation System UML Use Case diagrams modeling actors, workflows, and UI Prototypes.

DiagnoCare Smart Health Assistant UML Use Case diagrams modeling actors, workflows, and UI Prototypes

Stroke Mobility App (SLP) – In Testing A mobile Application for Stroke patients to regularly follow their exercise and speedup their recovery

LEADERSHIP & POSITIONS

Vice President – Riphah Computing Society 2026 – 2027 (Current) Riphah International University

- Leading university-wide computing initiatives and student engagement
- Conducted a hackathon under this society.
- Hosted OSFP Day.

Vice President – Riphah CyberSphere 2024 – 2025 Riphah International University

- Organized **Online Coding Competition**
- Delivered technical webinars and **cyber security awareness sessions**
- Helped in hosting of *Escape 404* – interactive tech event
- Received **Appreciation Award** for outstanding leadership

EXPERIENCE

Full Stack Mobile App Developer Research Collaboration – In Testing Developed mobile application supporting Physiotherapists at Riphah International University.

UI / UX Designer Smart Insight for Data Analysis – 4 months internship, designed mobile and web interfaces

Graphic Designer Binix IT Solutions – 6 months internship, designed social media posts and banners for clients

TECHNICAL SKILLS

Programming Languages: React Native, Python, JavaScript, C, C++, HTML, CSS

Mobile Development: React Native

UI/UX Design: Figma

Software Testing: Jira, ClickUp, Testrail, Katalon, Postman

Other Competencies: Leadership, Problem Solving, Presentation, Time Management, Data Management.
